### 1.1 BACKGROUND

Over the last decade, Blockchain technology has emerged, disrupting the real estate, entertainment, education, and financial services industries. To grasp the potential of Blockchain, think about how foreign and overwhelming the Internet felt in when it first appeared a few decades ago. Now think about where we are today. Today, the XR world has begun embracing the possibilities offered by Blockchain technology as an emerging industry that deals with many challenges in the supply chain, payment systems, and transaction tracking. Thus, Blockchain technology is poised to revolutionize innovative start-ups in handling their operations and commercializing their products to consumers. XR technologies are at the forefront of the high-tech revolution, reshaping how businesses position their offerings to improve their consumer experience. This technology decades ago was pure science fiction but is now made into reality. Virtual reality (VR) is widely used in all spheres of life, from entertainment and education to real estate and travel industries. This growth is reflected in the market value as well - in 2019, the global market value of VR was less than \$15 billion. With Covid-19 accelerating innovative technology, by 2023, it is anticipated to surpass \$70 billion. With XR and Blockchain currently being among the most popular topics globally, it is proper to explore how these two forces work together. Furthermore, in examining the current state of the XR industry, it is clear that leveraging Blockchain and cloud computing technologies will resolve the imminent challenges of charity donations, to raise awareness for Mental Health on a global scale. using NFTs collections and authenticity

## EXECUTIVE SUMMARY

TALENT COIN Talent Coin is the World's First Decentralized Talent Show! We will give most talented bands & musicians a REAL chance to showcase their talent to the world. Our X-Factor style talent show will be held within our own uniquely developed METAVERSE and attract millions

TALENT COIN aims to create a metaverse, a collection of virtual charity donations with tokens through Internet. In TALENT COIN, fans can interact with computer-generated imagery (CGI) and other users. We believe extended reality (XR), a mix of virtual reality, augmented reality, and mixed reality is at the forefront of enhancing human livelihood, wildlife, to raise awareness for Mental Health on a global scale. using NFTs collections and environment experiences whilst leveraging the power of blockchain, artificial intelligence and cloud computing technologies. This supports the innovation of Web 3.0. TALENT COIN proposes to build the first extended reality metaverse focusing on themes of the basic human instincts, such as curiosity, vision, community, idealism, vitality, generosity, and imagination. In building this, we are starting with the infrastructure of the metaverse, which is virtual charity donation, a non- fungible token

**Market Conditions:** As more decentralized metaverses are created, standardizing the use throughout the Blockchain is imperative. In the current state of play, charity donations adoption is limited. Furthermore, the XR hardware is not cost-effective, adding to other market factors that challenge the virtual donations and widespread adoption.

**Problem Assessment:** The profits will be split 80% to mental health charities, and 20% into the chart! -In the Talentverse Mind Records will provide the Record Deal to the winner of the Talent Show! Along with the Mind Records Shop and Mind Counseling

## WHY TALENT COIN ?

TALENT COIN first talent contest powered by a decentralised blockchain and held within a metaverse will be powered by Talent Coin. Talent coin users will 'spend' tokens to vote and advance their favorite performer in the competition. There will be numerous rounds in each season of the talent competition, leading up to a grand finale. The final will be evaluated by celebrities and will be shown live on YouTube as well as in the own metaverse! The winning act will earn a record deal with Mind Records as well as a substantial monetary award. These acts will all have devoted fan bases who will want to vote for and support their favorite acts in the competition. Fans will need to purchase talent coins and vote in each round to show their support for their favorite talents. Users who want to vote will be able to purchase Talent Coin on the contest website using a credit or debit card. The majority of the revenue generated by TalentVerse will come from non-crypto users! Because we'll make it simple for them to buy with simply a credit card if they want! This holds true for every aspect of TalentVerse.

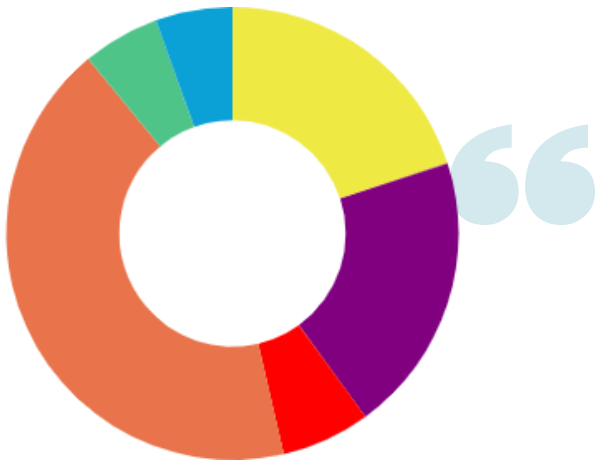

There are many 1000's of talented bands & singers around the world that will want to enter the contest. These acts will all have dedicated fanbases that will want to support their favorite acts in the competition and vote for them. For fanbases to support their acts, they will need to buy talent coin and cast their votes in each round. Users that wish to cast votes will be able to buy Talent Coin easily with a credit or debit card on the contest website..

## WHAT MAKES TALENT COIN SPECIAL?

The creators of the project make it unique, given the fact that Mark is a musician himself who lost many gigs due to the pandemic has created a platform for many other talented artists who lack resources to be a part of the future, The Mind Music initiative turned out to be a mammoth hit and given Talent Coin has been developed with similar principles, it could very well repeat the feat of Mind Music. Users can access the Talent MetaVerse and watch live performances throughout the Talent Verse seasons. As users watch musicians from all around the world compete and perform, imagine as a member of the crowd. Simply take in the entertainment and buy Talent Coins to connect with the MetaVerse. During the show, users can use their avatars to express themselves. They can clap, cheer, dance, and observe the reactions of the rest of the audience. The avatar can convey their emotions through the use of emojis, and observe the facial expressions of those around them. Players can purchase extra emojis, dances, clothing, accessories, and more through the NFTs platform to enhance their avatar and make it stand out. Talent Coins can be used to vote for the next global musical sensation by Metaverse users. Thousands of people will enter for a chance to win a record deal and a significant cash award. The winner will be determined by the votes of the audience. Talent Coins can also wager on their favorite musicians. Keep track of the odds, hedge the bets, and receive Talent Coins if the musician triumphs! The talent verse's currency is called talent coins, and it has a variety of purposes.
